Welcome Message

Dear Colleagues & Friends,

Greetings from D-TechCon 2023!

DTechCon 2023 (World Congress of Diabetes Technology and Therapeutics) is a global conference dedicated to the latest developments in the field of technology and therapeutics. The first DTechCon was held virtually in 2022 and was attended by over 4000 delegates from all over the world, making it a huge success. A large number of start-ups working in the field of health technology also participated in the conference.

The second DTechCon is being held in a hybrid mode with limited seats for physical attendance. Global thought leaders in the field have already confirmed their participation.

Various topics like mHealth, Digital Therapeutics, Wearable gadgets, non-invasive glucose monitoring, artificial intelligence and machine learning, tele-medicine, connected care, remote monitoring, diabetes reversal, and newer drugs will be discussed.

Additionally, workshops and hands-on training are planned for deeper understanding of insulin pumps, continuous glucose monitoring, Point of Care and futuristic therapy.

We are sure you will also enjoy the networking opportunities with various start-ups, industry partners and healthcare professionals.

Many researchers are presenting their abstracts during the conference and this will empower others to further pursue research in the field of diabetes and technology.

We hope you enjoy the feast of scientific knowledge sharing, making this conference the place to help you enhance your knowledge about diabetes and technology.

Looking forward to seeing you in Cochin next year for D-TechCon 2024...

Thanks and Regards,
Team - DTechCon 2023
